

Installing Stenograph Writer Drivers on Windows 8/Windows 10

Installing Stenograph Writer Drivers on Windows 8/Windows 10

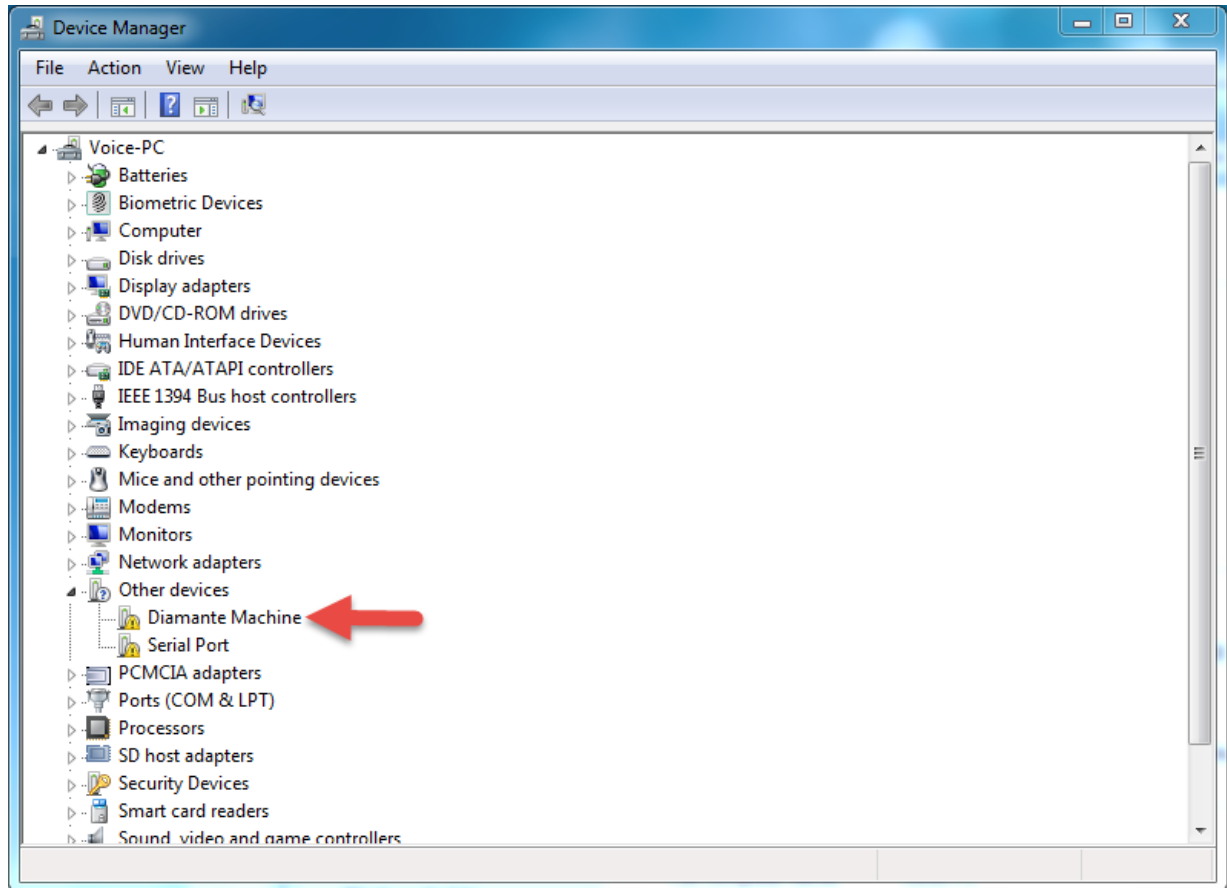

Note: If you are currently using Case CATalyst version 15 or above you can install the drivers in Case CATalyst. Click [here](#) for the instructions.

1. Connect the writer to your computer with the **USB cable** and turn the writer on.

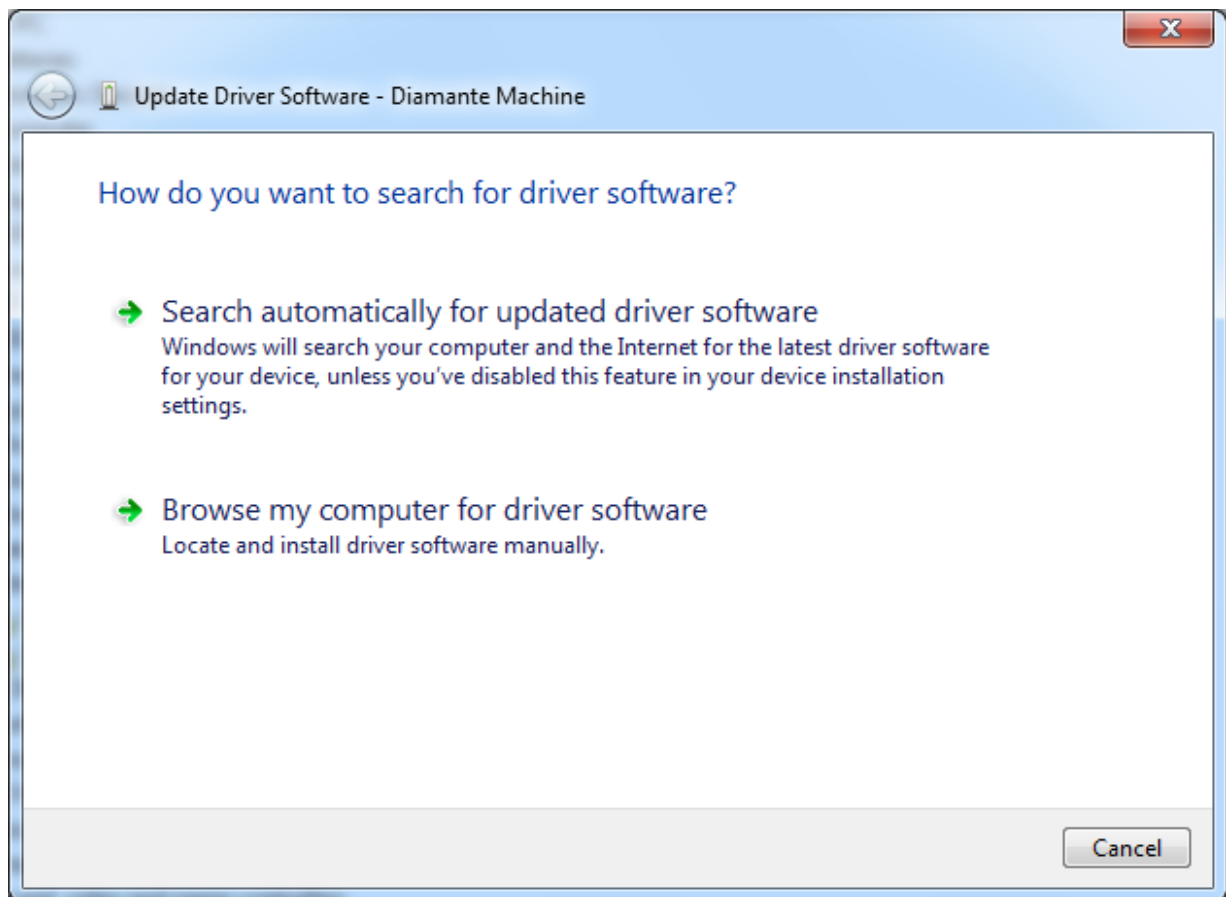

2. **Right** click on Start , and then left click on **Device Manager**.

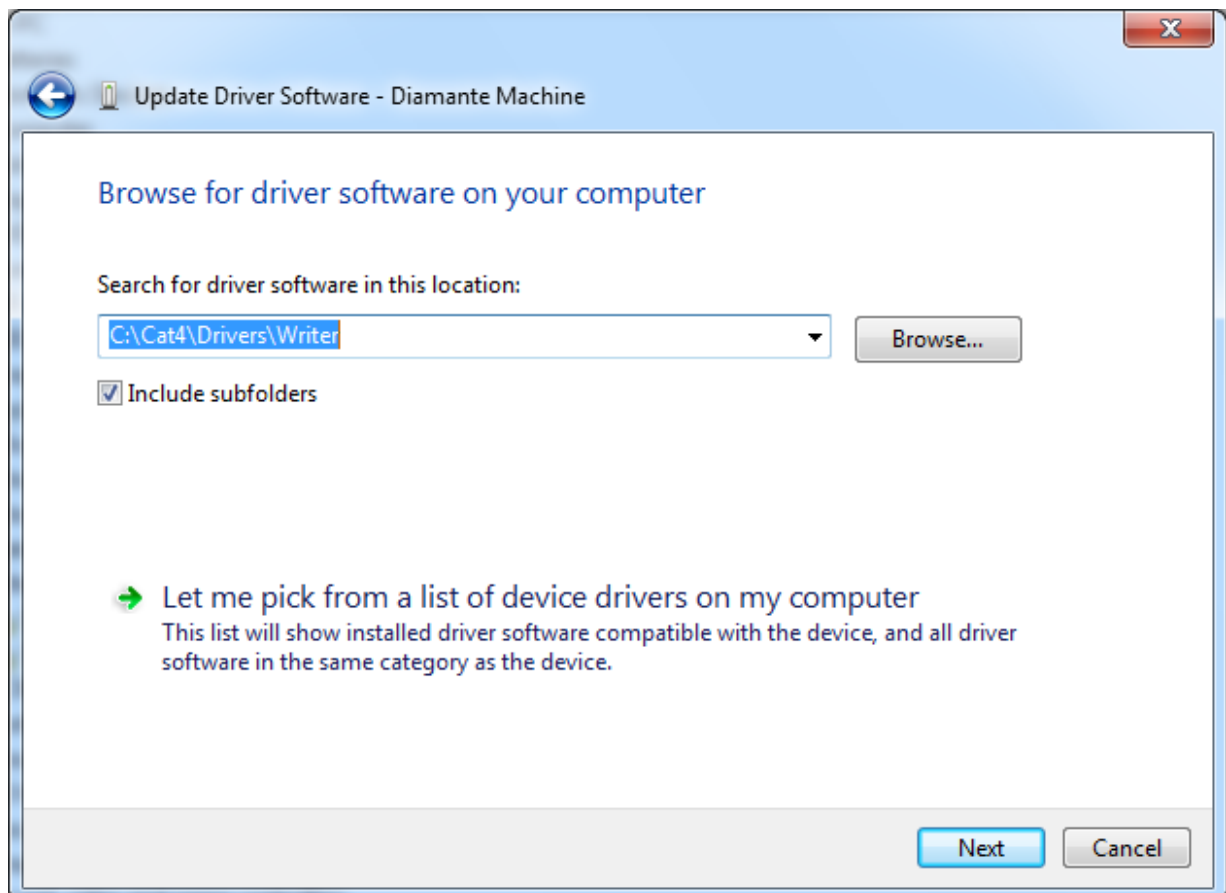

3. In Device Manager look for a category that says **Other Devices**. Below that you should see a yellow exclamation point that says **Luminex Machine, Diamante Machine, Stenograph Elan Mira, or Stenograph Fusion**. **Right click** on the yellow exclamation point and left click on **Update Driver**.

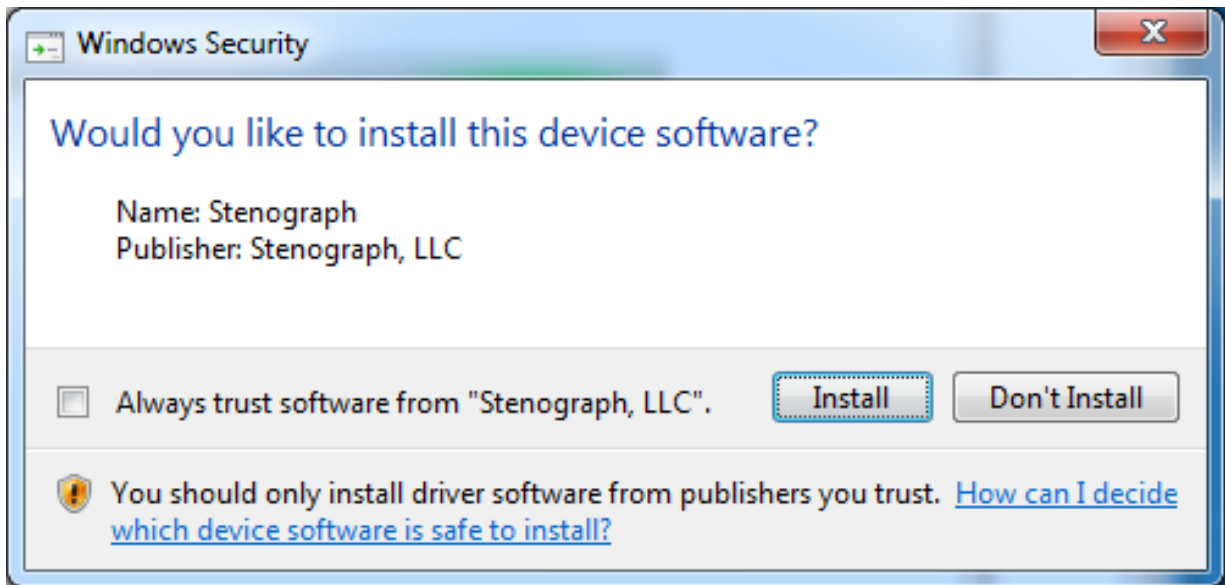

4. The **Update Driver Software** dialog window will appear. Left-click **Browse my computer for driver software**.

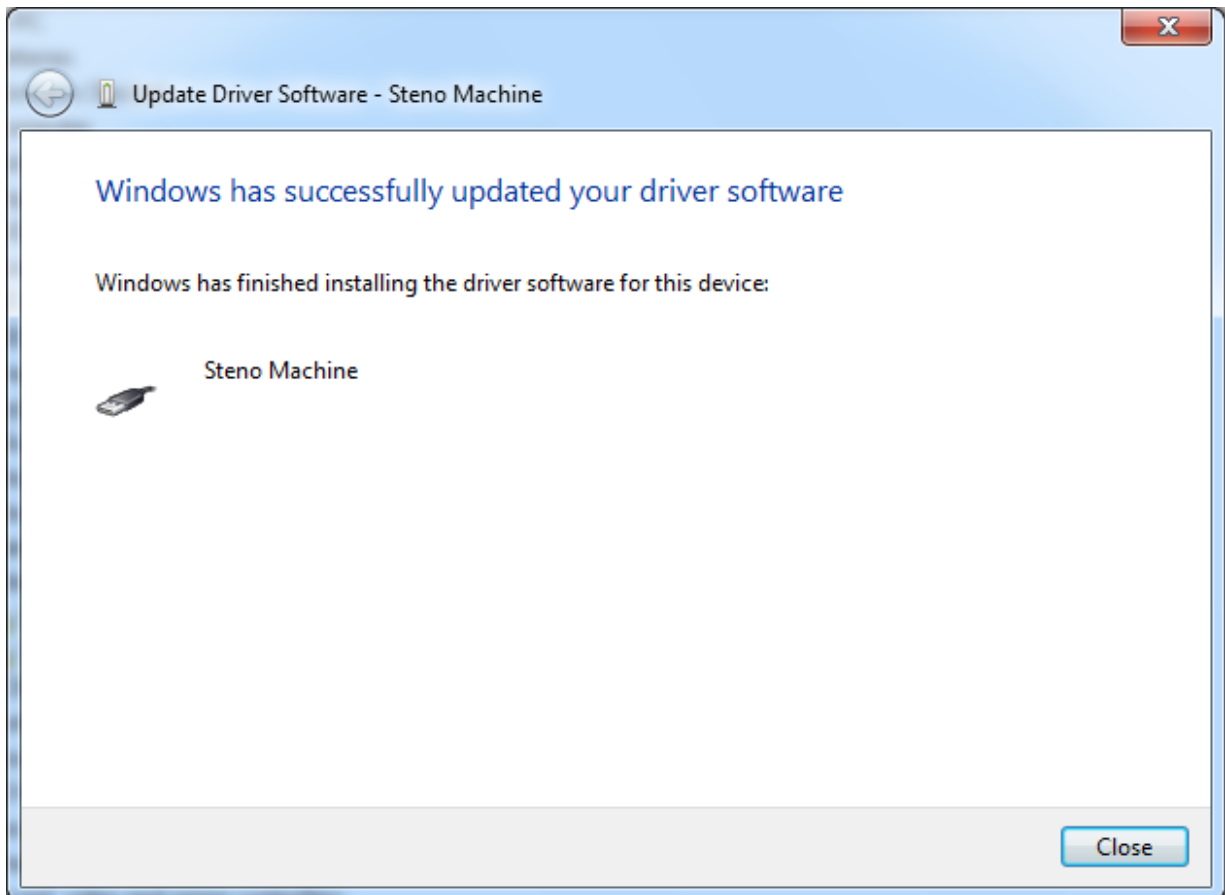

5. In the next screen type **C:\Cat4\Drivers\Writer** (or copy and paste this text) in the **Search for driver software in this location** field. Then click **Next**.

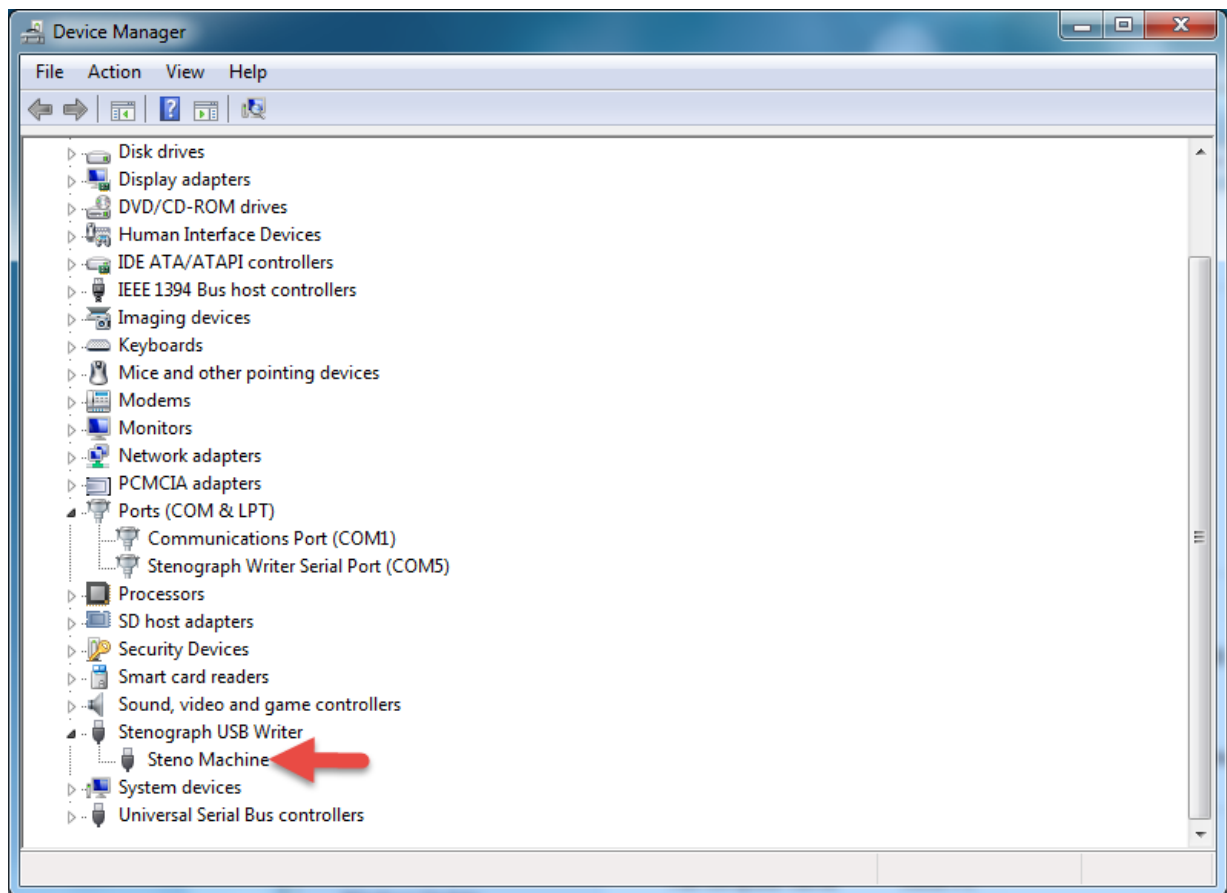

6. You will be prompted with a dialog window verifying the installation of the drivers. Click **Install**.

7. When the writer's USB driver has finished installing, click **Close**.

8. To confirm a successful installation has completed, a new category will appear that say Stenograph USB Writer without a yellow exclamation point next to it.

9. After installing the writer USB driver, you may get another driver installation wizard to install the **Stenograph Writer Serial Port**. Follow steps 4-7 to install the drivers.
