

Apostrophe, and Grave Accent not working with my Apple MacBook on Windows 7

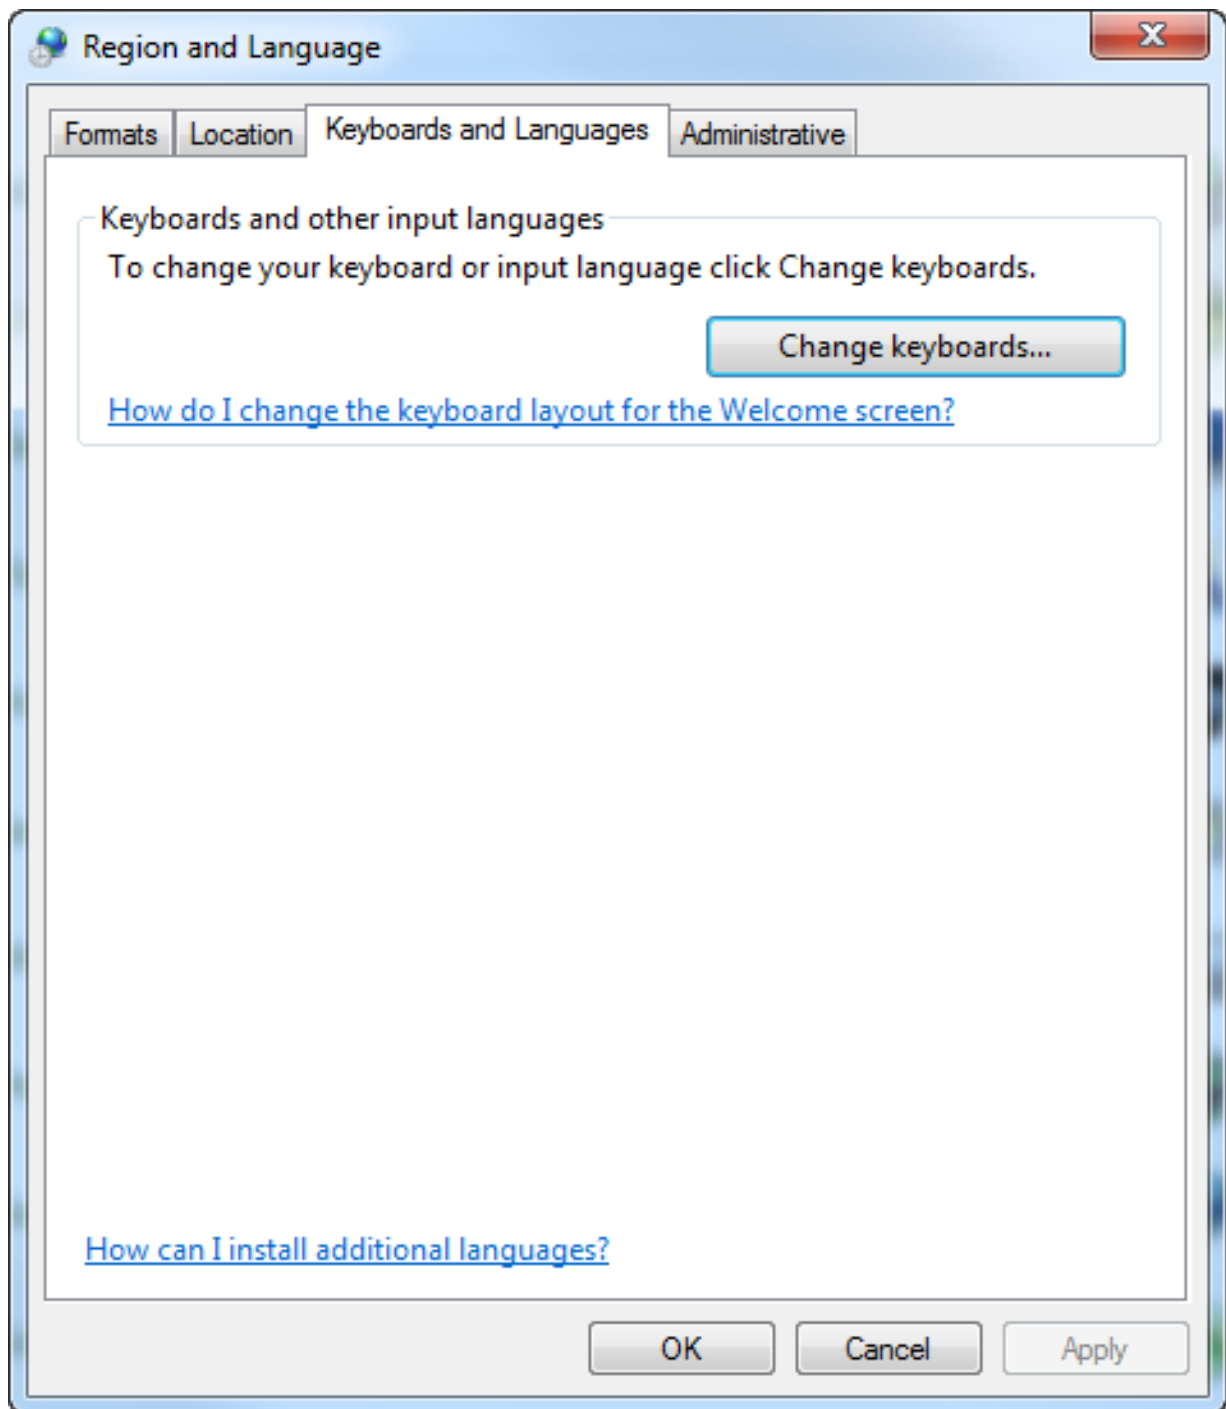

This issue could occur after a user has been using Boot Camp on their MacBook computer. This is due to the default Regional Keyboard is set to English (United States) - United States Apple.

This keyboard has changes that will cause problems with the apostrophe and grave accent keys when running Windows 7 on Boot Camp. To correct this problem, follow these steps to Add and then change to the English (United States) - US keyboard in Windows 7.

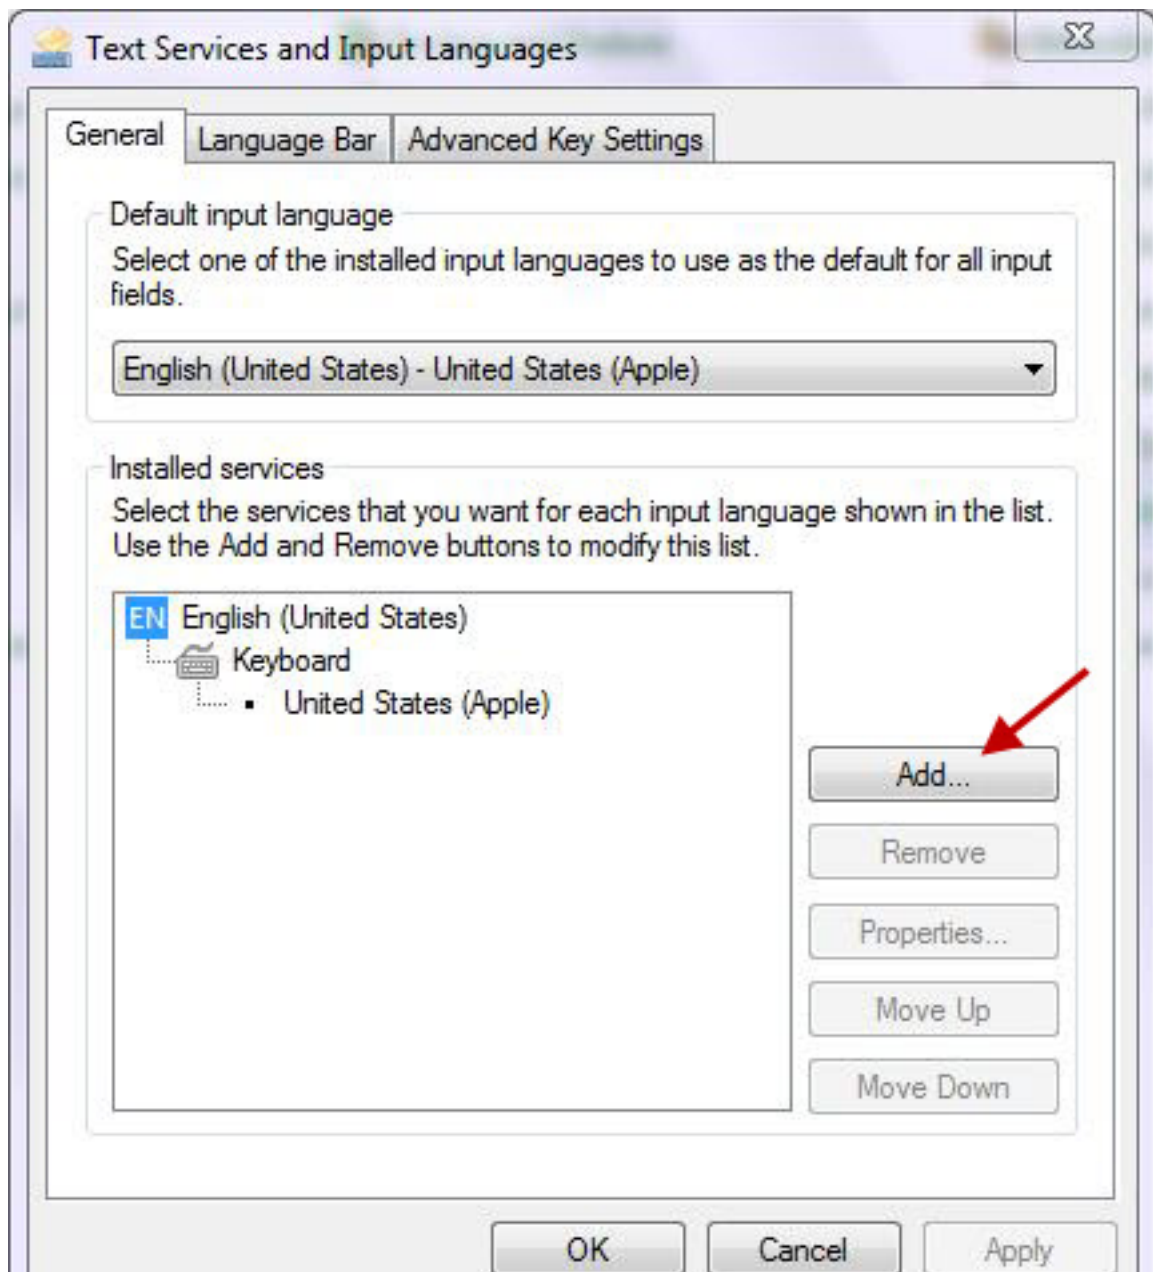

1. In [Control Panel](#), double click on the Region and Language option.

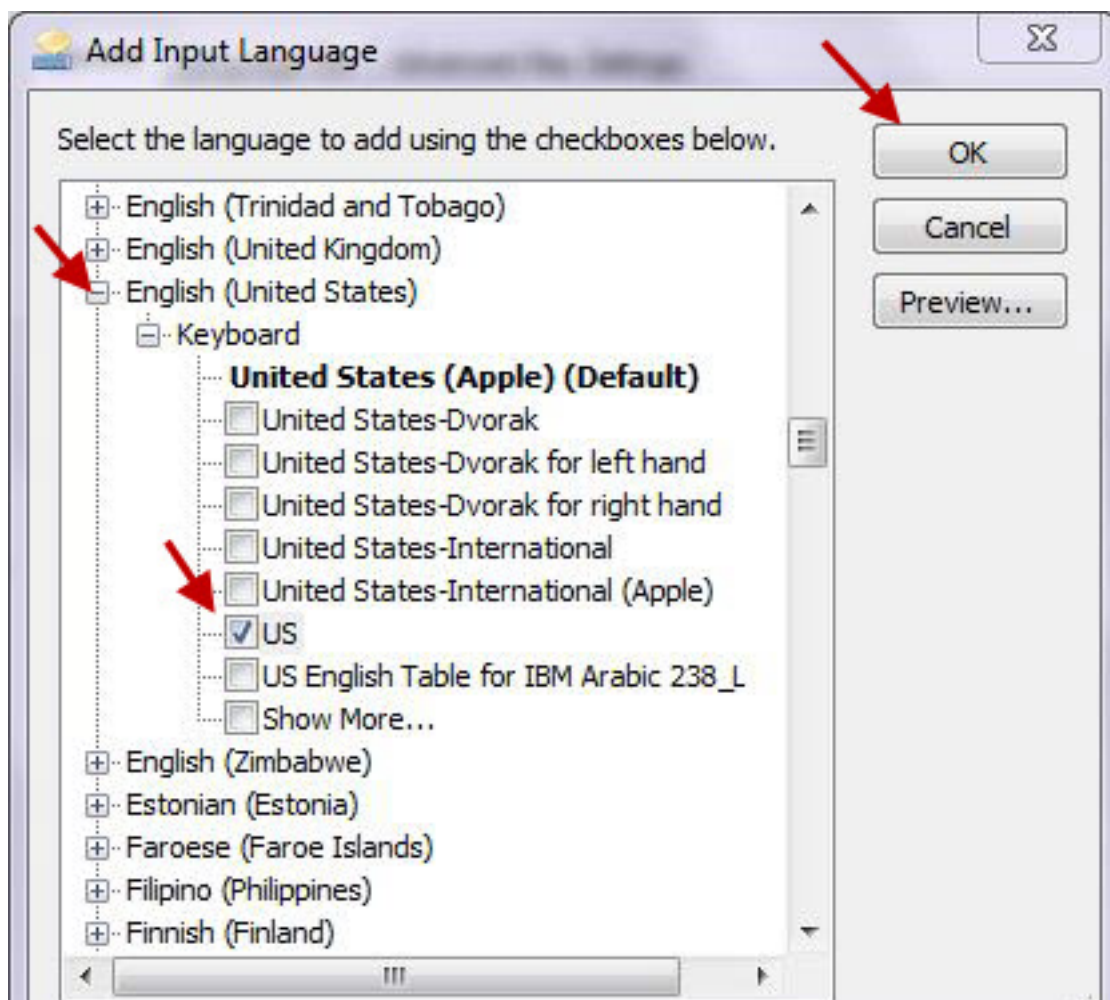

2. In Region and Language, click on the **Keyboard and Languages** tab, then click on the **Change Keyboards...** button.

3. The English (United States) – United States (Apple) is selected as the default input language in the Text Services and Input Languages dialog box. It is also the only keyboard under Installed Services.

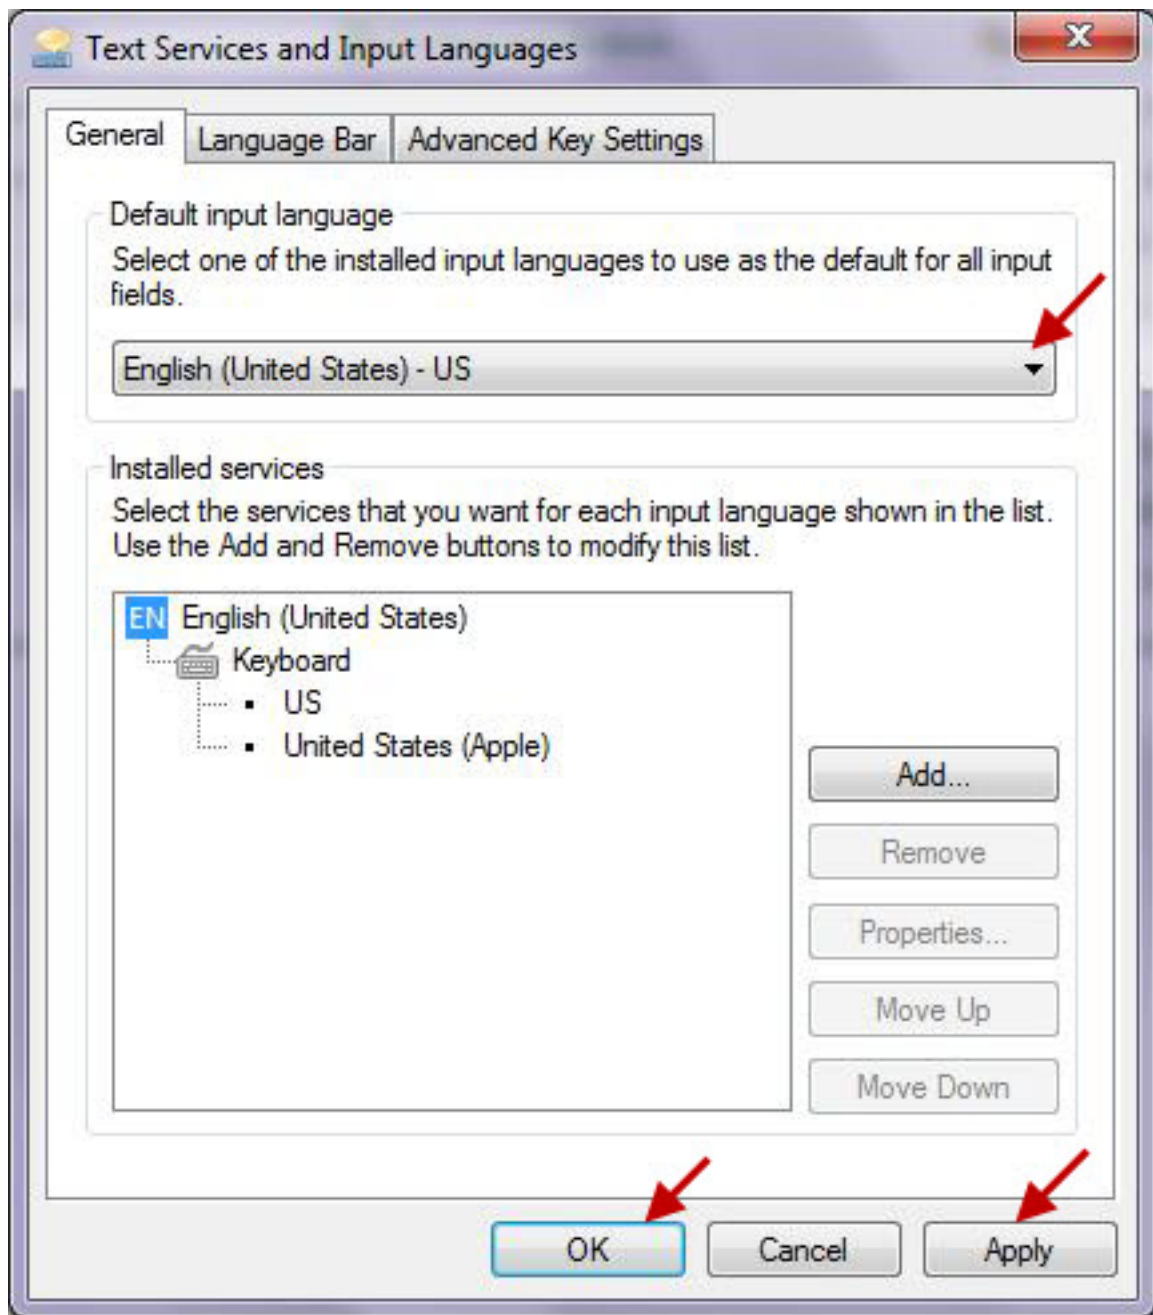

Click the **Add** button. The Add Input Language Dialog box will display:

Scroll down to find the **English (United States)** heading and click the **plus (+)** sign. In that drop down menu, under Keyboard, check the **US** box and click **OK**.

4. In the Text Services and Input Languages Dialog box, select **English (United States) – US** in the Default input language drop down. Highlight the **United States (Apple)** keyboard and click **Remove** button. Click the **Apply** then **OK**.

The apostrophe and grave accent will now work in Case CATalyst.
